PROFESSIONAL SUMMARY

Product & Delivery Manager with 10+ years in games across PC MMORPGs, Web3 gaming, mobile 4X strategy, hybrid-casual portfolios, and live-streaming platforms. Shipped 4 titles in 10 months by introducing Agile/Scrum from scratch, nearly tripled D1 retention (10% to 28%) on a focus title, scaled a live platform to 5M+ monthly audience-hours, and managed live operations and monetization for a $3M-revenue RPG. Strong in LiveOps, KPI-driven monetization (LTV, ROAS, ASO), A/B testing, ad mediation (AdMob, AppLovin MAX), and multi-store release management (Apple App Store, Google Play, Huawei AppGallery). Experienced managing stakeholders across Chinese studios, B2B clients, and global freelance teams.

PROFESSIONAL EXPERIENCE

Producer (Contractor), *Symmetric Studio* 06/2025 – Present | Riyadh, Saudi Arabia

- Shipped 4 hybrid-casual and casual titles in 10 months with a 5-person team by introducing Agile/Scrum and market-readiness processes.
- Brought a team with no Agile exposure to a stable sprint cadence in 3 weeks, with clear role ownership across engineering, design, and multimedia tracks.
- Built ad mediation (Google AdMob, AppLovin MAX), ASO, and data-tracking pipelines so teams could independently monitor retention, LTV, DAU, and attribution.
- Raised D1 retention from 10% to 28% on the studio's focus title through data-driven iteration on the new analytics stack.
- Ran A/B tests on every title, driving feedback loops on core features, UI/UX, ASO, and ad creatives.
- Held final QA sign-off authority across all titles.
- Guided UI/UX interface overhauls and visual-identity direction across the pipeline.
- Modeled progression loops and economy-balancing frameworks, reused as a foundation across the studio's pipeline.

Product Manager, *Nifty Craft* 03/2024 – 05/2025 | Beirut, Lebanon

- Led end-to-end delivery of a PC MMORPG combining PvPvE deckbuilding combat with blockchain-based player economies, managing a team of 10 across engineering, design, and leadership (Trello).
- Ran a 3-stage market validation of the Web3/NFT model (streamer demos, 2 Steam Next Fest showcases, 10 external playtests) that generated 14,000 wishlists.
- Found that Steam's core-gamer audience was a poor fit for NFT-based ownership, then recommended and worked with Web3-native alternatives such as Immutable, redirecting the go-to-market strategy before launch.
- Held final UAT/QA sign-off for high-concurrency multiplayer, deckbuilding progression, and real-time synchronization.

Technical Product & Delivery Manager (B2B) 03/2022 – 02/2024 | Beirut, Lebanon

FALAFEL GAMES

- Served as primary client-facing partner for an outsourced 4X strategy mobile game and platform modernization, owning timelines and translating technical architecture into business terms.
- Delivered both B2B products, including a challenge-based short-video app, on schedule and within budget.
- Authored technical design documentation for 100+ features and systems across both products, and directed ~15 global freelancers.
- Partnered with UI/UX on visual-identity overhauls and implemented interface changes directly in the mobile dev environment.
- Directed release management across Apple App Store, Google Play, and Huawei AppGallery, from internal testing to production.

Product Manager, *FALAFEL GAMES* 09/2020 – 02/2022 | Beirut, Lebanon
Taqki (interactive livestreaming app)

- Scaled the platform to thousands of concurrent users, sustaining 5M+ monthly audience-hours across an 18-hour daily live content window.
- Acted as end-to-end Product Owner, establishing Agile/Scrum for sprint planning, user stories, and cross-functional alignment.
- Designed interactive mini-games and real-time viewer mechanics; ran feature testing and QA sign-off before release.
- Ran regular dev streams to collect direct player feedback, feeding a continuous design-iteration loop.
- Managed creator operations: scheduling, streaming infrastructure, and performance-based compensation models.

Publishing Manager, *FALAFEL GAMES* 01/2017 – 08/2020 | Beijing, China

- Owned live operations, weekly performance reporting, and release tracks for a $3M-revenue monster-collection RPG and mobile portfolio, partnering with executive leadership on monetization.
- Led regional localization and launch of a new 4X strategy game, and drove the Turkish market release of the flagship RPG.
- Recruited and led a 10-person team (data, content, localization, customer success) to launch a new digital platform.
- Oversaw analytics tooling, KPIs (retention, LTV, DAU), and ASO; reviewed UA/ROAS data with executives to tune monetization.

Live Ops Manager, *FALAFEL GAMES* 09/2014 – 12/2016 | Beirut, Lebanon

- Ran the feature roadmap, live event calendar, and in-game events for a flagship monster-collection RPG, driving revenue through data-led monetization.
- Designed a VIP tiering and long-term engagement program that grew LTV by 35%.
- Served as primary contact with the Chinese development studio, localizing and culturalizing updates for regional retention.
- Owned the release pipeline for patches, version deployments, and client updates.
- Built weekly reporting on user behavior and event performance.
